

# Sorting, Classifying, & Describing

## Sorting:

1. Place several random objects in a bag , ensuring that there are duplicate objects.
2. Ask students to sort the items .

## Classifying:

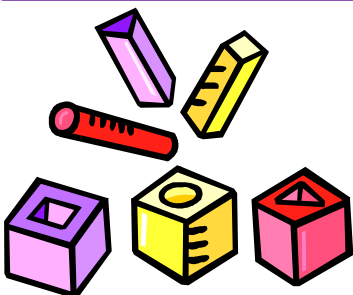

1. Once the items are sorted ask the students to explain how they classified the items.
2. Encourage students to sort and classify in multiple ways.

## Describing:

1. Ask students to describe the items using as many adjectives (describing words) as they can.

## Description Extension

1. Place several random objects in a bag (s).
2. Ask students to select one item, feel the item, and describe the item to classmates. Encourage students to use as many describing words as they can.
3. Repeat until all children have a chance to describe an item.
